

RAIDS AI - EU AI Act Controls Mapping

How the Platform Helps Customers Evidence Their Obligations

This is the customer-facing compliance value story - useful for sales, marketing, and customer compliance teams.

Art.	Obligation	How the RAIDS AI Platform Helps Customers Evidence This	Relevant Product Feature
Art. 9	Risk management system across the AI lifecycle	Continuous monitoring surfaces emerging risks in real time, feeding evidence into customers' ongoing risk management processes	Real-time risk detection
Art. 12	Record-keeping / automatic logging	Generates a complete, tamper-evident audit trail of AI system behaviour and interventions	Audit trail
Art. 14	Human oversight	Flags unsafe behaviour and enables intervention before it reaches end users, supporting human-in-the-loop oversight	Unsafe behaviour prevention
Art. 15	Accuracy, robustness & cybersecurity	Ongoing behavioral monitoring helps detect drift, degradation, or adversarial manipulation post-deployment	Continuous monitoring
Art. 72	Post-market monitoring	Provides the always-on monitoring infrastructure that post-market monitoring plans require	Real-time monitoring
Art. 73	Serious incident reporting	Detected incidents are logged and timestamped, giving customers the evidence base to meet reporting deadlines	Audit trail/detection alerts
